a square anti-parallel to the x-axis but a parallel to the z-axis. For $m_f=0$, the matrices $\Delta_{\pm}$ can be determined and we find $\mathcal{D}_{\pm}=a^2\delta_{\pm}$, with the non-zero entries $$\delta_{\pm}=1\pm\frac{\left(1-2J^2\right)^{3/2}}{\sqrt{J}}\mbox{.}$$ It can be verified that $$2\mathcal{D}_{\pm}\sum_{n}|\lambda_n|^2=m^2$$ as it should be. In conclusion, we have studied the Landau levels of the two-flavor massless Majorana fermion in the background of a hyperbolic hedgehog black hole in the presence of a very weak electromagnetic field in comparison to the electronic charge e. For this case of very weak field, only a single (complex) Landau level has non-zero contributions. This is in contrast to the analogous system of the Dirac fermion where there are (real) Landau levels with non-zero contributions for any non-zero value of the electric field. [99]{} S. Deser, R. Mark Wahlberg is a proud Boy Scout and has been showing off his talents in the field. Recently the actor was presented with the Distinguished Eagle Scout Award by his local scouting organization, Wahlberg is the first and only actor to ever be so honored. The award was given to Wahlberg on October 6th at a ceremony held at the Eagle Scout Hall in Westford, Massachusets. Some of the duties that Wahlberg performed while a Boy Scout include hiking to some of the highest peaks in New England, helping clean up Hurricane Sandy damage in New York City, and saving a drowning man in Boston's Charles River. In a post on Facebook announcing the event, Wahlberg wrote "This is a complete honor, not just for me but for the great scouting spirit and values I learned." He added, "Being recognized as the only actor ever to be given this award is a HUGE honor." It's a pretty impressive list of duties for a 13 year old. Although the majority of Wahlberg's achievements were in Boy Scouts, he eventually transferred to a newer organization, the Girl Scouts, for his Girl Scout Council.Cotton pom-pom: the petal of a cotton house flower, recorded from the Mediterranean area and ranging from western France to North Africa. The cotton pom-pom (Glossogyne tenuifolia) is a house flower from the Mediterranean basin that could be introduced into North America. In order to better understand its possible invasion potential, we present comprehensive morphological and molecular characterization of populations collected from different locations of the Mediterranean area. Morphological variation is related to the geographic origin of the plant, as well as to the time at which the flowers were collected. The ploidy level of some populations was investigated by meiotic chromosome counts. Molecular analysis using RAPD, ISSR and SSR markers revealed considerable genetic variation among some species, suggesting the existence of yet undescribed species in Morocco, Algeria and Tunisia, as well as the presence of a new hybrid. The existence of populations from other areas of the Mediterranean basin (e.g. eastern Algeria) is also suggested.a to 12:10c (October 21, 2014) [message repeated on Sep 16 from Calbeth]: We're also planning to investigate support for strict ANSI compliance in the future.
